

Piezoelectric diaphragm

Piezoelectric diaphragm is a basic electronic sound component. It has the advantages of simple structure, stable performance and high reliability. It is not only the core element of piezoelectric buzzers and the alarms, but also used as shock sensors in many sensitive equipments.

	Part Number	Dimensions(mm)				Characteristics		
		D	d	t	T	Fr (KHz)	R (Ω)	Co (pF)
001	AW4E6.5T-70E	6.5	5	0.05	0.11	7.0	2500	7000
002	AW1E6.5T-135E	6.5	5	0.10	0.22	13.5	2500	28000
