#### **1.SCOPE**

**SAW FILTER** 

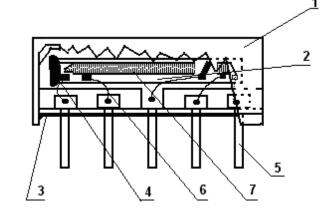

SHOULDER'S SAW filter series have broad line up products meeting all broadcast standard including NTSC,PAL and SECAM systems. These filters are composed of two interdigital transducers on a single-crystal. piezoelectrical chip. they are used in electronic equipments such as TV and so on.

#### **2.**Construction

2.1 Dimension and materials Manufacturer's name :SHOULDER ELECTRONICS LIMITED Type : AF38A2Dc

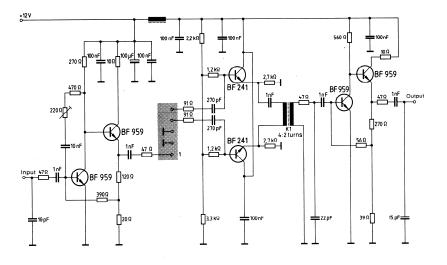

YY:year WW:week

| Components     | Materials         |
|----------------|-------------------|
| 1.Outer casing | PPS               |
| 2.Substrate    | Lithium niobate   |
| 3.Base         | Epoxy resin       |
| 4.Absorber     | Epoxy resin       |
| 5.Lead         | Cu alloy+Au plate |
| 6.Bonding wire | AlSi alloy        |
| 7.Electrode    | AI                |

#### 2.2. Circuit construction, measurement circuit

Test circuit for SIP-5 filter Input impedance of the symmetrical post-amplifier: 2 k $\Omega$  in parallel with 3 pF

#### **3.**Characteristics

| Items                                 | Conditions   | Specifications            |
|---------------------------------------|--|---------------------------|
| Standard<br>atmospheric<br>conditions | Unless otherwise specified , the standard rang of atmospheric conditions for making measurements and tests is as follows;<br>Ambient temperature $:15^{\circ}$ C to $35^{\circ}$ C Relative humidity $:25\%$ to $85\%$ Air pressure $:86$ kPa to $106$ kPa |                           |
| Operating<br>temperature rang         | Operating temperature rang is the rang of ambient temperatures in which the filter can be operated continuously. $-20^{\circ}$ C ~ $+60^{\circ}$ C   | There shall be no damage. |
| Storage<br>temperature rang           | Storage temperature rang is the rang of ambient<br>temperatures at which the filter can be stored<br>without damage.<br>Conditions are as specified elsewhere in these<br>specifications. $-20^{\circ}$ C ~ $+80^{\circ}$ C                                |                           |
| Reference<br>temperature              | +25°C  |                           |

#### 3.1 Maximum Rating

| DC voltage | VDC | 12 | V | Between any terminals |
|------------|-----|----|---|-----------------------|
| AC voltage | Vpp | 10 | V | Between any terminals |

#### **3.2 Electrical Characteristics**

| Source impedance    |  | $Zs=50 \Omega$        |          |      |             |       |    |
|---------------------|--|-----------------------|----------|------|-------------|-------|----|
| Load impedance      |  | $Z_L=2k \Omega //3pF$ | 1        |      | $T_A=25$ °C | C     |    |

#### **3.3Environmental Performance Characteristics**

| Item        | Condition   | Specifications        |
|-------------|---|-----------------------|
| High        | The specimen shall be store at a temperature of             |                       |
| temperature | $80\pm2$ °C for 96±4h. Then it shall be subjected to        |                       |
|             | standard atmospheric conditions for 1h, after               |                       |
|             | which measurement shall be made within 1h.                  |                       |
| Low         | The specimen shall be store at a temperature of             | Mechanical            |
| temperature | $-20\pm3$ °C for 96 $\pm$ 4h. Then it shall be subjected to | characteristics and   |
|             | standard atmospheric conditions for 1h, after               | specifications in     |
|             | which measurement shall be made within 1h.                  | electrical            |
| Humidity    | The specimen shall be store at a temperature of             | characteristics shall |
|             | 40±2℃ with relative humidity of 90% to 96%                  | be satisfied. There   |
|             | for 96±4h. Then it shall be subjected to standard           | shall be no           |
|             | atmospheric conditions for 1h, after which                  | excessive change in   |
|             | measurement shall be made within 1h.                        | appearance.           |
| Thermal     | The specimen shall be subjected to 8 continuous             |                       |
| shock       | cycles each as shown below. Then it shall be                |                       |
|             | subjected to standard atmospheric conditions for            |                       |
|             | 1h, after which measurement shall be made                   |                       |
