# DSC8002 Series

1.8 to 3.3V

PureSilcon™ Programmable CMOS Oscillator

www.discera.com

### **General Description**

The DSC8002 is a programmable MEMS based PureSilicon™ Oscillator. Using the DragonFly™ or TimeFlash™ handheld programmer, the end user can program the DSC8002 within seconds to any frequency from 1 to 150MHz in increments of 100Hz (up to four decimal point resolution). The nominal operational range spans from 1.8 to 3.3 Volts, without any need for additional external components, providing ease of use and flexibility in multi-voltage applications.

The DSC8002 incorporates an all silicon resonator that is extremely robust and nearly immune to stress related fractures, common to crystal based oscillators. Without sacrificing the performance and stability required of today's systems, a crystal-less design allows for a higher level of reliability, making the DSC8002 ideal for rugged, industrial, and portable applications where stress, shock, and vibration can damage quartz crystal based systems.

Available in industry standard packages, the DSC8002 can be "dropped-in" to the same PCB footprint as standard crystal oscillators.

# **Block Diagram**

#### **Features**

- Frequency Range: 1 to 150MHz
- Exceptional Stability over Temperature
- Operating voltage
  - 1.8 to 3.3V (nominal)
  - 1.65 to 3.60V (absolute max)
- Operating Temperature Range
  - o Industrial -40°C to 85°C
  - o Ext. Commercial -20°C to 70°C
  - Commercial 0°C to 70°C
- Low Operating and Standby Current
  - 3mA Operating (40MHz)
  - 1uA Standby
- Ultra Miniature Footprint
  - o 2.5 x 2.0 x 0.85 mm
  - o 3.2 x 2.5 x 0.85 mm
  - o 5.0 x 3.2 x 0.85 mm
  - o 7.0 x 5.0 x 0.85 mm
- Excellent shock and Vibration Resistance
- Lead Free, RoHS & Reach SVHC Compliant
- Handheld programmer available for purchase

#### **Benefits**

- Pin for pin "drop in" replacement for industry standard oscillators
- Semiconductor level reliability, significantly higher than quartz
- Frequency Resolution to 4 decimals
- Fully Programmable Operating Voltage and Frequency
- Longer Battery Life / Reduced Power
- Compact Plastic package
- Cost Effective

### **Applications**

- Mobile Applications
- Consumer Electronics
- Portable Electronics
- CCD Clock for VTR Cameras
- Low Profile Applications
- Industrial

#### Notes:

- Absolute maximum ratings are those values beyond which the safety of the device cannot be guaranteed. The device should not be operated beyond these limits.
- 2. Output frequency to within 100ppm of final stable output frequency.
- 3. See typical cycle to cycle jitter graph for frequency dependence.

PART NUMBERING GUIDE					
Package (Plastic QFN)	Temperature	Stability	Frequency	Packing Option	
P=A: 7.0x5.0mm P=B: 5.0x3.2mm P=C: 3.2x2.5mm P=D: 2.5x2.0mm	T=C: $0^{\circ} \sim +70^{\circ} \text{ C}$ T=E: $-20^{\circ} \sim +70^{\circ} \text{ C}$ T=I: $-40^{\circ} \sim +85^{\circ} \text{ C}$	<b>S=1:</b> ±50ppm <b>S=2:</b> ±25ppm	XXX.XXXX (4 decimal places)	Blank: Tubes T: Tape & Reel	

Example: DSC8002CE1-123.0000T

The example part number above is a 123.0000MHz oscillator in Plastic 3.2x2.5mm package, with  $\pm 50$ ppm stability over an operating temperature of -20 to  $\pm 70^{\circ}$ C, shipped in Tape and Reel. The reel size (7" or 13" diameter) will be determined by the factory based on quantity.

Unprogrammed blank parts can be ordered by omitting the Frequency field. (eg. DSC8002CE1) Unprogrammed parts are shipped in tubes only.
