

Ultrasonic cosmetic transducer is the core component of ultrasound cosmetic massager. With the high-frequency vibration energy generated by the ultrasonic cosmetic transducer, the ultrasound cosmetic massager can achieve the skin surface massage, and can also help skin to absorb the skin care products at the same time.

Thickness resonant frequency	$1.0 \pm 0.05 \text{ MHz}$	
Resonant impedance	$\leq 1.0 \Omega$	
Static capacitance	$1700 \pm 20\% \text{ pF}$	at 1000Hz/1V
Kp	≥ 0.53	
Loss (tgδ)	$\leq 0.53\%$
