# 7.6 mm ( 0.3 inch) Micro Bright Seven Segment Displays 

## Technical Data

## Features

- Available with Colon for Clock Display
- Compact Package
$0.300 \times 0.500$ inches Leads on 2.54 mm ( 0.1 inch ) Centers
- Choice of Colors Red, AlGaAs Red, High Efficiency Red, Yellow, Green
- Excellent Appearance Evenly Lighted Segments Mitered Corners on Segments Surface Color Gives Optimum Contrast $\pm 50^{\circ}$ Viewing Angle
- Design Flexibility

Common Anode or Common Cathode

Right Hand Decimal Point $\pm 1$. Overflow Character

- Categorized for Luminous Intensity
Yellow and Green Categorized for Color
Use of Like Categories Yields a Uniform Display
- High Light Output
- High Peak Current
- Excellent for Long Digit String Multiplexing
- Intensity and Color Selection Available See Intensity and Color Selected Displays Data Sheet
- Sunlight Viewable AlGaAs

HDSP-730X Series
HDSP-731X Series
HDSP-740X Series
HDSP-750X Series
HDSP-780X Series
HDSP-A15X Series

## Description

The 7.6 mm ( 0.3 inch ) LED seven segment displays are designed for viewing distances up to 3 metres ( 10 feet). These devices use an industry standard size package and pinout. Both the numeric and

[^0]$\pm 1$. overflow devices feature a right hand decimal point. All devices are available as either common anode or common cathode.

These displays are ideal for most applications. Pin for pin equivalent displays are also available in a low current design. The low current displays are ideal for
portable applications. For additional information see the Low Current Seven Segment Displays.

## Package Dimensions

|  | Thermal Resistance LED Junction-to-Pin | $R \theta_{\text {J-PIN }}$ |  | 200 |  | ${ }^{\circ} \mathrm{C} / \mathrm{W} / \mathrm{Seg}$ |  |

## Notes:

1. Case temperature of device immediately prior to the intensity measurement is $25^{\circ} \mathrm{C}$.
2. The digits are categorized for luminous intensity. The intensity category is designated by a letter on the side of the package.
3. The dominant wavelength, $\lambda_{\mathrm{d}}$, is derived from the CIE chromaticity diagram and is that single wavelength which defines the color of the device.
4. Typical specification for reference only. Do not exceed absolute maximum ratings.
5. For low current o peration the AlGaAs HDSP-A101 series displays are recommended.
6. For low current operation the HER HDSP-7511 series displays are recommended.
7. For low current operation the Yellow HDSP-A801 series displays are recommended.
8. For low current operation the Green HDSP-A901 series displays are recommended.
9. The yellow (HDSP-7400) and Green (HDSP-7800) displays are categorized for dominant wavelength. The category is designated by a number adjacent to the luminous intensity category letter.

## Contrast Enhancement

For information on contrast enhancement please see Application Note 1015.

## Soldering/Cleaning

Cleaning agents from the ketone family (acetone, methyl ethyl ketone, etc.) and from the chlorinated hydrocarbon family (methylene chloride, trichloroethylene, carbon tetrachloride, etc.) are not recommended for cleaning LED parts. All of these various solvents attack or dissolve the encapsulating epoxies used to form the package of plastic LED parts.

For further information on soldering LEDs please refer to Application Note 1027.

4. 1500 Viewing Angle

- Design Flexibility

This is a Cmmon Anode device with Right Hand Decimal Point

- Categorized for Luminous Intensity Use of Like Categories Yields a Uniform Display
- High Light Output
- Excellent for Long Digit String Multiplexing

## DESCRIPTION

The 7.6 mm ( 0.3 inch) LED seven segment displays are designed for viewing distances up to 3 metres ( 10 feet). These devices use an industry standard size package and pinout. The numeric devices feature a right hand decimal point.This is a common anode device. These displays are ideal for most applications.

## Application Notes

$\square$ Application Note:
AN 1031- Achieving Uniform Front 100 KB Cliq Cliq Panel Appearance using 2 Intensity Bin Select Option for LED Devices
$\square$ Application Note: $62 \mathrm{~KB} \quad$ Cliq Cliq
AN 1005-Operational considerations for pdf
LED lamps and display devices

## HDSP-A153-NO000

## 7.6 mm(0.3 inch) Micro Bright Seven Segment Displays

$\square$

## LIFE CYCLE STATUS

AC - Active
This product is Market released and in full production

## FEATURES

- Compact Package

1. $0.300 \times 0.500$ inches
2. Leads on 2.54 mm ( 0.1 inch) Centers

- Choice of Color:AlGaAs
- Excellent Appearance

1. Evenly Lighted Segments
2. Mitered Corners on Segments
3. Light Gray Surface Color Gives Optimum Contrast
4. 1500 Viewing Angle

- Design Flexibility

This is a Cmmon Cathode device with Right Hand Decimal Point

- Categorized for Luminous Intensity Use of Like Categories Yields a Uniform Display
- High Light Output
- Excellent for Long Digit String Multiplexing

## DESCRIPTION

The 7.6 mm ( 0.3 inch) LED seven segment displays are designed for viewing distances up to 3 metres ( 10 feet). These devices use an industry standard size package and pinout. The numeric devices feature a right hand decimal point.This is a common cathode device. These displays are ideal for most applications.

## Application Notes

[^0]:    Note:

    1. These displays are recommended for high ambient light operation. Please refer to the HDSP-A10X AlGaAs, HDSP-335X HER, HDSPA80X Yellow, and HDSP-A90X Green data sheet for low current operation.
