SCOPE

This specification is for SMD VCTCXO(Temperature Compensated Crystal Oscillator).

APPLICATION STANDARDS

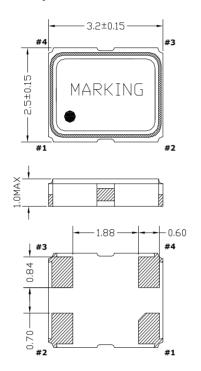

MIL-STD-883.

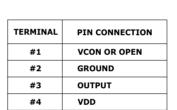

ELECTRICAL SPECIFICATIONS

| | Darameters | Electrical Specifications | | | | | |
|-------------------------|-------------------------|---------------------------|--------------|-------|--------|--|--|
| Parameters | | MIN | TYP | MAX | UNITS | | |
| Frequency(Fo) ref: 2 | 5℃ | | 26.000000 | | MHz | | |
| Frequency Tolerance | e at 25℃ | -1.0 | | + 1.0 | ppm | | |

APPLICATION GUIDELINES

Correct application and strict adherence to the important information listed below, will be ensure optimum performance of the crystal oscillator.

SHOCK RESISTANCE

SHOULDER's all products are designed to endure physical shocks.

(Drop test consist of three drops onto a hard wooden board from a height of 75cm)

Nevertheless, under some condition, crystal products may be damaged by drops or

Shocks during mounting.

It is important, therefore, to run mounting machines as smoothly as possible to Prevent under shocks. Please review conditions prior to using a mounting machine.

VIBRATION RESISTANCE

Mechanical vibration of a piezo buzzer could cause frequency and amplitude Change to the output frequency. It is advisable to use cushion or cutting PCB, if You mount on same PCB.

SOLDERING CONDITION

Please keep the conditions of "Reflow diagram"

STORAGE

We recommend storing products at +15°C to +35°C and 25% R.H to 75% R.H

RoHS

SHOULDER's all products are complies with all relevant international regulations concerning he substances with environmental impacts.
