# SPECIFYING SIMPLE PACKAGED CRYSTAL OSCILLATORS (SPXOs)

A typical SPXO specification reads like this:

The following notes define each element of the specification.

## Frequency

Frequency is normally specified in kilohertz (kHz) up to 999.999 kHz and in megahertz (MHz) from 1.0MHz. All our computer-generated transaction documents follow this standard convention automatically.

The SPXO frequency should be described to seven significant figures. If seven significant figures are not used, we assume that any figure that might follow those given may be taken as zero. Thus a frequency given as 16.6MHz will be taken as 16.60, not 16.66667.

#### Model Number

The model number incorporates information which describes output compatibility and holder style.

## Frequency Stability

The frequency stability of an SPXO includes the initial adjustment tolerance at room temperature, the tolerance over operating temperature range and the effect of supply voltage variation. This value is specified as 'parts per million' (ppm) and is available in four ranges; ±15ppm, ±25ppm, ±50ppm & ±100ppm.

- $A = \pm 25ppm$   $B = \pm 50ppm$   $C = \pm 100ppm$
- $N = \pm 15$ ppm

#### **Non-Standard Frequency Tolerances**

During manufacture, it is possible to adjust some SPXO's to a specific tolerance at room temperature. The frequency tolerance forms part of the frequency stability. These oscillators have a second letter code to indicate the frequency tolerance.

■ D =  $\pm 5$ ppm ■ E =  $\pm 10$ ppm ■ F=  $\pm 25$ ppm

## **Standard Operating Temperature Ranges**

■ 0 to 50°C —40 to 85°C 0 to 70°C —55 to 125°C

## **Operating Temperature Range**

An oscillator is designed to work over any one of three temperature ranges:

- Commercial: 0 to 70°C
- Military: –55 to 125°C
- Industrial: -40 to 85°C

Although in general oscillators will continue to operate outside their normal temperature range with a degradation in frequency stability, damage can result if the temperatures reached are excessive.

## Packaging Code

All items are bulked packed only.

■ BU = Bulk packed

#### Additional Text Code

If the product is non-standard, the letter "T" will appear at the end of the product specification. This refers to additional text on the purchase order to identify the special requirements.

## **Outline Drawings**

Dimensions on the oscillator outline drawings are shown only as a guide. Precise dimensions of oscillator holders are available from our Engineering Department upon request. All dimensions are shown in mm (& inches) and are nominal unless otherwise stated. All outlines are at a scale of 1:1 unless otherwise specified.

## **Delivery Options**

The following Express delivery options are available for certain oscillators; timescales refer to despatch from our factories.

- 3 working days (Express service)
- 5 working days (Express service)
- 7 working days (Express service)
- 10 working days (Express service)

Prices for larger quantities and longer delivery times are generally lower due to substantially reduced manufacturing costs. Please refer to individual datasheets for further information.

#### Marking

Product will be indelibly marked as detailed in the individual data sheets. Where space is limited some or all of the information will be omitted/truncated at CFP's discretion. Full product description will be found on the individual batch packaging.

## **Ordering Information**

See individual data sheets

## NEW MILITARY OSCILLATOR RANGES

CFP has introduced several new military oscillator substrates that utilise the latest in design techniques and technology. Consequently, certain model numbers are now obsolete and new (replacement) model numbers have been issued.

The table below provide for a comparison between the old and the new model numbers. It must be emphasised that

all existing devices have a direct alternative within the new range and some ranges have been extended in order to encompass new customer requirements.

Please refer to the appropriate component data sheet for more detailed information. If you require further help, please contact our sales office.
