

# **CBB 60**

#### Product Anatomy

# Motor run capacitors features:

- Non induction winding structure of metallic polypropylene membrane.
- It is small in bulk, has long life-span and good self-healing characteristic.
- ♦ High insulating resistance, little temperature changing inside, excellent stability of capacitance.
- Non-toxic and non-leaking, profit environmental protection.

### Usages:

 Suitable for starting and operating 50Hz(60Hz)AC single-phase electromotor.

♦ Widely used as the start-up and running capacitor that is special for micro water pump,cleaning machine,washing machine,and single-phase household electrical appliances.

Motor run capacitor alternate design include the followings:

•Use round plastic shell,and insulation sealed lid for sealing,plastic lid for sealing or resin for sealing.

◆Flat bottom or fixing stud M8\*12

- ◆Fasten terminals,Lug,wire,cable.
- ◆Plastic can,ABS,PC.
