### **1. SCOPE**

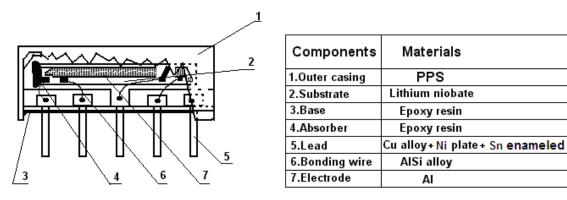

SHOULDER'S SAW filter series have broad line up products meeting all broadcast standard including NTSC,PAL and SECAM systems. These filters are composed of two interdigital transducers on a single-crystal. piezoelectrical chip. they are used in electronic equipments such as TV and so on.

### **2.** Construction

2.1 Dimension and materials Manufacturer's name: SHOULDER ELECTRONICS Co. LTD(CHINA) Type: BF54A1Dc

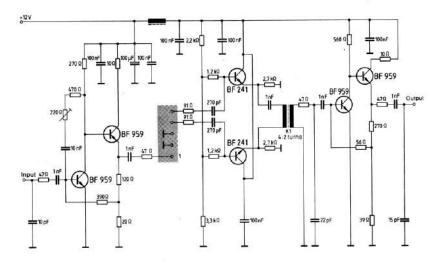

YY: year WW: week

## HDBF54A1Dc

#### 2.2. Circuit construction, measurement circuit

Test circuit for SIP-5 filter Input impedance of the symmetrical post-amplifier: 2 k $\Omega$  in parallel with 3 pF

## **3.**Characteristics

| Items                                 | Conditions   | Specifications            |
|---------------------------------------|--|---------------------------|
| Standard<br>atmospheric<br>conditions | Unless otherwise specified , the standard rang of atmospheric conditions for making measurements and tests is as follows;<br>Ambient temperature $: 15^{\circ}$ C to $35^{\circ}$ C Relative humidity $: 25\%$ to $85\%$<br>Air pressure $: 86$ kPa to $106$ kPa |                           |
| Operating<br>temperature rang         | Operating temperature rang is the rang of ambient temperatures in which the filter can be operated continuously. $-20^{\circ}$ C ~ $+60^{\circ}$ C   | There shall be no damage. |
| Storage<br>temperature rang           | Storage temperature rang is the rang of ambient temperatures at which the filter can be stored without damage.<br>Conditions are as specified elsewhere in these specifications. $-40^{\circ}$ C ~ $+70^{\circ}$ C   |                           |
| Reference<br>temperature              | +25°C  |                           |
